Smart Communications

CTLog®

Digital recording system with online web monitoring, which can record analog extensions, digital proprietary extensions, IP, trunks, intercoms, microphones, radio, fax, speakers and pc screens.

CTLogPlus®

Audio, video and document management recording system, ideal for recording meetings, audiences, speeches and videoconferencing services with local or centralized storage, search online and broadcast.

CTMail®

Integrated solution with auto attendant, voicemail, audio text, fax server, IVR and unified messaging services (fax, voice, email) with voice recognition and text to speech features.

CTMessage®

Carrier Class Platform for value-added voice, video and data services, such as voice and text messaging, SMS, Color Ring Backtone, Social Network Apps, advertising channels (BTL) and video applications.

CTPushToTalk®

Push to talk over IP solution for IP / PBX, SIP extensions, contact center, speakers, web and IoT devices.

CTTranscription®

Automatic voice and video transcription solution based on speech-to-text technology and phonetic search. Reduces manual transcription time and editing style by up to 70%.

CTWebRTC®

Onmichannel platform for voice, video, chat and collaboration. Provides WebRTC, chatserver and chatbot services with IA integration, public social networks and collaboration apps.

Dalí®

Smart Call Accounting solution for several IP-PBX or softswitches with centralized management, statistical reports and Web interface.
